

13th November 2012

DEMOLITION OF MELROSE, PEEBLES, & SELKIRK COURTS, BELVILLE STREET, GREENOCK

River Clyde Homes has appointed Safedem Ltd as the demolition contractor for the demolition operations. This leaflet provides information about the demolition works and how the surrounding neighbourhood may be affected. Further leaflets will follow to keep you updated.

THE DEMOLITION SITE - SAFETY FIRST

A site boundary fence has been erected, and displays warning notices alerting passers-by to the dangers of demolition sites. These signs clearly advise to keep out of the demolition site. There will be some increased traffic in the area, mainly because lorries will be used to remove materials and rubble from the demolition site. We ask for co-operation from everyone in the area to warn children and visitors to keep out of the demolition site and to take extra care crossing the roads nearby.

Additional security measures have been implemented and we are working with Strathclyde Fire and Rescue to try and minimise any further occurrences of deliberate fire-raising

DEMOLITION INFORMATION CENTRE

Our Demolition Information Centre will be open on Thursday 15th of November between 10am and 2pm. We will open the Centre between 10am and 2pm every Tuesday and Thursday thereafter. The Centre is located at the entrance to our site near Melrose Court. If you would like to know more about the demolition project, pop along to see us.

DEMOLITION UPDATE - TEST BLAST - THURSDAY 15TH NOVEMBER

We have started removing fixtures and fittings from the buildings including bathrooms and kitchens and windows. All of these materials are being removed from the site. Asbestos removal is also ongoing with all asbestos containing materials being safely removed from site.

The actual demolition will not take place for a number of months but we will keep you updated.

We plan to carry out test blast operations on the morning of Thursday 15th November. You may hear a few loud sirens and few loud bangs when these tests are carried out. This will allow us to finalise certain elements for the demolition. Please be aware that all appropriate health and safety precautions will be put in place and no one needs to be evacuated for these test blasts.

MORE INFORMATION

If you would like more information, please do not hesitate to contact
Tracey Sinclair, our Community Liaison Manager at **Safedem Ltd**
